

There's
more to **life**
at Nestlé

Are you interested in applying your educational background in a company with global reach?

Do you want to gain knowledge and experience in a dynamic environment?

Would you find it beneficial to learn how to further develop some of key competencies for success in an International company?

We invite you to consider a challenging role in our Internship Program at Nestlé Adriatic. Fresh graduates looking for real hands-on experience, we welcome your applications. An internship will give you every opportunity to develop yourself through working on real projects as part of our factory team and utilize the skills and knowledge you have acquired at University.

We have an open application for Internship program in our **Engineering Team in Factory Surčin**.

Intern in Engineering Team (m/f)

If you would like to learn how to:

- Monitor Stoppage Analysis from Downtime Reporting System and develop/adapt maintenance plan to ensure optimal operation and reduction of unplanned stoppages
- Ensure the implementation of the Nestlé Maintenance Strategy by aligning maintenance plans with business plans for short and long term requirements
- Assist in scheduling maintenance plans, tasks and resources in cooperation with engineering and production departments at the right time and quality to maintain asset reliability and continuously improve the overall plant performance
- Ensure that the maintenance activities in industrial services are planned properly
- Ensure maintenance plans and task lists are created, updated and documented by asset
- Support the technical stores management through a proper link between the planned maintenance activities and the required spare parts, in advance, to help the whole technical store optimization process
- Improve factory maintenance planning process
- Ensure that all planned maintenance activities are executed with high quality and in time
- Assist Engineering team in improving ways of working

Profile of the candidate:

- Bachelor's degree with a relevant technical background
- Engagement in different student projects or student associations
- Good analytical skills
- Ability to generate innovative solutions and proactively build relationships
- Enthusiastic & goal oriented person
- Advanced knowledge of English language
- Advanced MS Office knowledge

If you think that this opportunity is in line with your professional and personal growth, please send us your resume in English via application [link](#) not later than **19.4.2019**. Candidates who will be invited for interview will get notification latest 2 weeks after advert expiry. All other applicants will receive official notification after end of the selection process.
