

Dear students,

If you are ready for the next step in your career and want to contribute to our success, we invite you to apply for the position:

Toyo Internship program-Maintenance, Utility & QA Laboratory

About the Internship

Are you curious about how things get made, how production works, and what it takes to keep operations running smoothly? Join our Team as an intern and get hands-on experience in the real world of manufacturing! This internship is available within our **Maintenance, Utilities, and QA Laboratory teams**, giving you the opportunity to explore different aspects of production and operations. This program is designed to help you learn, grow, and discover your career path.

What You'll Be Doing

- Be part of the daily activities and see how production works.
- Assist with day-to-day tasks in your assigned department.
- Support ongoing projects and contribute fresh ideas.
- Support process improvement initiatives to increase efficiency
- Support the team in making sure everything runs on time and safely.
- Conduct research, prepare reports, or analyze data as needed (don't worry, we'll show you how!).
- Learn about problem-solving on the production floor.
- Get involved in projects to make processes faster, smarter, and more efficient.
- Collaborate with cross-functional teams on projects.
- Learn and apply lean manufacturing, 5S, and other production-related methodologies.

What We're Looking For

- Students of final year (or recent graduate) from Faculty of Mechanical Engineering
- Curious, motivated, and eager to learn.
- Good communication and teamwork skills.
- Advanced computer skills (Excel, Word, PowerPoint are great to have).
- Fluency in English
- No prior experience needed – just bring your enthusiasm and willingness to learn!

What We Offer

- Paid internship program.
- Meal provided during working hours.
- Organized transportation.
- Real-world, hands-on production experience.
- Guidance and mentorship from professionals in the industry.
- Exposure to modern production methods and tools.
- A chance to work on meaningful projects (your ideas matter here!).
- Opportunities to build your network and develop career skills.
- Possibility of a full-time job offer for outstanding interns.

We invite all interested to send their applications by April 20, 2026. to email:
